DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Haber et al (5,320,609).

Haber is an automatic pharmaceutical dispensing syringe that discloses a medication delivery pen with a predetermined amount of medication (see column 1, line 68-column 2, lines 1-2) and capable of dispensing multiple dosages of medication (see column 1, lines 60-66) having a cartridge (16), a plunger (152), a lead screw (158), a driver (140) with a keyway, channel and slot (see figure 3C) and a reset ring (176) [see figure 3], wherein the ring has a protruding spline and is unilaterally formed with the spline (see figure 3C), an annular stop (see figure 3) and a dose knob (6).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walters et al (6,221,053), Walters et al (5,961,495) and Chanoch et al (5,725,508) disclose medication delivery pens.
